

Proposed Solar Project in Amherst County, VA

Situated east of Patrick Henry Highway, this 50 MW solar facility seeks to **revitalize a brownfield** through a multi-use operation consisting of solar, sheep grazing, and pollinator meadows.

Why Piney River Solar is Good for Amherst County:

 Will generate nearly **\$10 million** in tax revenue over its lifetime.

 Will incorporate a one-time siting agreement payment of **\$2.4 million** to the county to be used at the discretion of Amherst County.

 Will establish a **\$30,000 annual community fund** focused on supporting Amherst County non-profits

 Will create **200 well-paying jobs** during construction across civil, mechanical, electrical, and landscaping industries, while providing a boost to local hospitality businesses.

 The project will be **effectively screened** from nearby neighbors and recreational amenities

If you agree that landowner rights should be protected in Amherst County and projects like Piney River Solar should be allowed to move forward, please...

 Call your elected officials. Find their contacts here: <https://www.countyofamherst.com/supervisors/>
